## NSH awarded mega projects in Sadara

**Dammam(KSA) :** NSH has been awarded the **Chlorine and brine construction** contract for the \$20 billion Sadara project. Sadara Chemical Company (Sadara) is a 50/50 joint venture between Saudi Arabian Oil Company (Saudi Aramco) and The Dow Chemical Company (Dow). NSH scope of work will be to construct the Project which is comprised of **LSPB 1-** Chlor Alkali , HCU & ESS **LSPB 2 –** Brine.

This award is part of a world scale, fully integrated chemicals complex being built by Sadara in Jubail Industrial City in Saudi Arabia. Dow and Saudi Aramco complex will be one of the world's largest integrated chemical facilities, and the largest ever built in a single phase. First production units are expected to come on line in the second half of 2015, with all units completed, up and running in 2016. NSH has also been awarded the SADARA Isocyanates Project for DNT/MNB Area.

## NSH Wins Contract - SAFCO - V

**Dammam(KSA) :** NSH has been awarded in Saudi Arabia SABIC affiliate Safco (Saudi Arabian Fertilizer Company) construction contract for the project "Safco V". The contract encompasses the fifth expansion of the industrial complex of Al-Jubail, by the development of a new urea plant located approximately 100 kilometres north of Dammam, on the eastern coast of Saudi Arabia. The scope of work includes the construction of plant with a production capacity of 3,250 tons per day of urea, along with associated utilities as well as off-site systems and interconnecting structures with existing plants. The project will be completed in first half 2014.
